

1 min Poster Video

Our poster shows three sections, the first one shows a motorbike with three passengers instead of one. The second section shows the third student who is a passenger is tired and sleepy. The last section shows the student who was sleepy, falls down and gets knocked down by the car which was bending them. This situation is caused by drivers who are greedy, they want to collect more fare and also students who want to spend little money by sharing a ride so they use the money to buy candy and get to play video games.

1 min Recommendations

Us as VIA ambassadors we have 4 recommendations.

1. Parents help us build a fence around our school playground which is adjacent to the road for more safety
2. We need a speed bump in one of the dust roads near our school to reduce speedy cars
3. We ask the Police traffic department to make sure there is an officer who is responsible to help students to cross the road in the morning and afternoon
4. We will continue to raise awareness of safe mobility to our fellow students through drawing different prevention posters.
